

Liver Treats

Ingredients:

1-2 containers chicken livers

1-2 packages tapioca flour

Pour 1 (or 2) containers of chicken livers in food processor and blend until thoroughly mixed. Gradually add 1 (or 2) packages of tapioca flour. Mix until well blended. The mixture should be thick – like pudding.

Spread aluminum foil on one or two large cookie sheets (19”) and spray liberally with non-stick spray. Pour the mixture and spread evenly.

Bake 1 ½ hours at 250 degrees. Leave mixture in oven overnight, if possible, or at least until completely cool. The mixture will start to lift up on the sides. (If the mixture is a little wet, bake longer).

Cut into strips with a pizza cutter and then use scissors to cut into small pieces. Makes about 8 small baggies total which can be frozen.

NOTE: This can cause a laxative effect in some dogs, so it is suggested to use tiny amounts for training.

Use these super special treats to reward correct responses to difficult behaviors – coming with distractions, ignoring other dogs, etc.
